Web Hosting Setup

Selected Custom PHP/HTML website

Screenshot of the Hostinger dashboard showing the selected "Custom PHP/HTML website" option.

The dashboard features a sidebar with various services: Home, Websites (selected), Domains, Horizons, Emails, Email marketing (New), VPS, Billing, and Marketplace (New). The main area displays a "Websites" section with a Black Friday sale banner. A search bar is at the top right. Below it, a "Single Web Hosting" card shows options like "Hosting Horizons" (using AI), "WordPress" (flexible customization), "Hostinger Website Builder" (AI-powered builder), and "Custom PHP/HTML website" (upload code or install applications). A "Get new hosting plan" button is also present.

Screenshot of the "Who is this website for?" setup step.

The page starts with a greeting: "Hello! Who is this website for?". It includes two radio button options: "Myself or my business" (selected) and "Someone else". To the right is an illustration of a person sitting on a stool, working on a laptop, surrounded by icons related to web development and design. At the bottom right are "Skip" and "Next →" buttons.

What domain name do you want to use for this website?

A domain is the web address of your site that people can use to visit it. Get a new domain or use a domain that's already yours.

The screenshot shows a search interface for a domain name. The search bar contains the text "umakevoting.online". Below the search bar, there is a list of suggestions, with the first one being "umakevoting.online" preceded by a green checkmark.

73%

[← Back](#)[Use temporary domain](#)[Next →](#)**Where is your target audience located?**

We've selected a data center in **Singapore**, the closest one we have to **Philippines**, to ensure faster load times for your target audience. You will be able to change data center later. Your website's backups will be stored in India (Mumbai).

Delete auto-generated default.php in public.html

The screenshot shows a file browser interface with the following details:

- Left sidebar:** My files, New folder, New file, Trash bin, Space (0.01%, 712 Kib / 10 GiB), Inodes (0.09%, 185 / 200000), Settings.
- Top bar:** Search bar, navigation icons (Home, Back, Forward, etc.), file operations (Edit, Copy, Paste, Delete, etc.).
- Current path:** public_html
- File list:** Name (default.php), Size (15.99 Kib), Last modified (13 minutes ago).

Go to github and copy public repository https URL

The screenshot shows a GitHub repository page for '3AG7-PBL' with the following details:

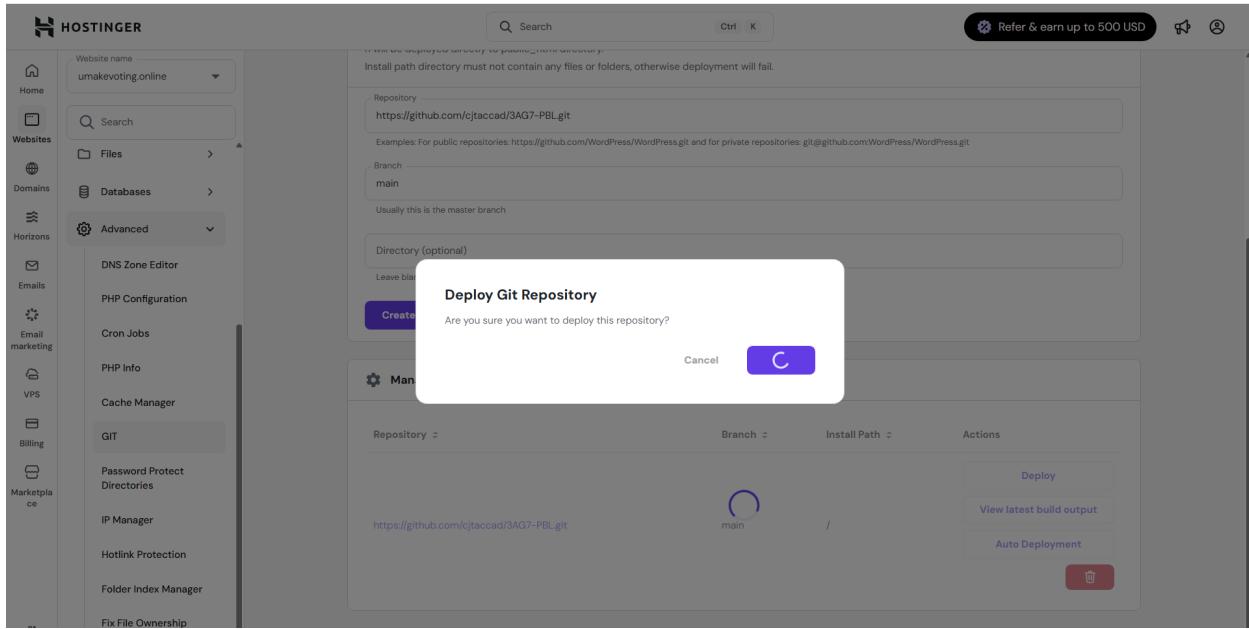

- Header:** cjtaccad / 3AG7-PBL, Code tab selected.
- Repository Overview:** Local, Codespaces, Clone (HTTPS, SSH, GitHub CLI), URL: <https://github.com/cjtaccad/3AG7-PBL.git>.
- Code Tab Content:** List of files and commits, including audit_exports, dompdf, phpmailer, uploads, Admin_dashboard.php, UMAK.png, add_candidate.php, admin_dashboard.php, announcement.php, audit_helper.php, auditlogs.php, auth-style12.css, bg.jpg, candidates.php, dashboard.php, dashboard12.css, db_tables_data.txt, and dbc.php.
- Right Sidebar:** About (3AINS Group7 - UMak E-Voting System, umakevoting.online), Activity (0 stars, 0 watching, 0 forks), Releases (No releases published, Create a new release), Packages (No packages published, Publish your first package), Languages (PHP 92.5%, CSS 7.5%), Suggested workflows (Laravel, Symfony).

Go to hpanel > git > paste public repository https URL and input branch of repository

The screenshot shows the Hostinger hPanel interface. On the left, there is a sidebar with various management options like Home, Websites, Domains, Horizons, Emails, Marketing, VPS, Billing, and Marketplace. The 'Advanced' section is expanded, showing sub-options such as DNS Zone Editor, PHP Configuration, Cron Jobs, PHP Info, Cache Manager, GIT, Password Protect Directories, IP Manager, Hotlink Protection, Folder Index Manager, Fix File Ownership, and Activity Log. The main content area is titled 'GIT' and shows a 'Private Git Repository' section with a 'Generate SSH Key' button. Below it is a 'Create a New Repository' section. It has fields for 'Repository' (containing 'https://github.com/cjtaccad/3AG7-PBL.git'), 'Branch' (set to 'main'), and 'Directory (optional)'. A 'Create' button is at the bottom of this form. At the top right of the main area, there is a 'Refer & earn up to 500 USD' button and other user interface elements.

Deploy the repository

This screenshot shows the same hPanel interface after a repository has been deployed. The 'Manage Repositories' section is visible, listing the previously entered repository details: 'Repository' is 'https://github.com/cjtaccad/3AG7-PBL.git', 'Branch' is 'main', and 'Install Path' is '/'. To the right of this table are several buttons: 'Deploy' (purple), 'View latest build output' (blue), 'Auto Deployment' (white with blue text), and a red trash can icon. The rest of the interface and sidebar are identical to the first screenshot.

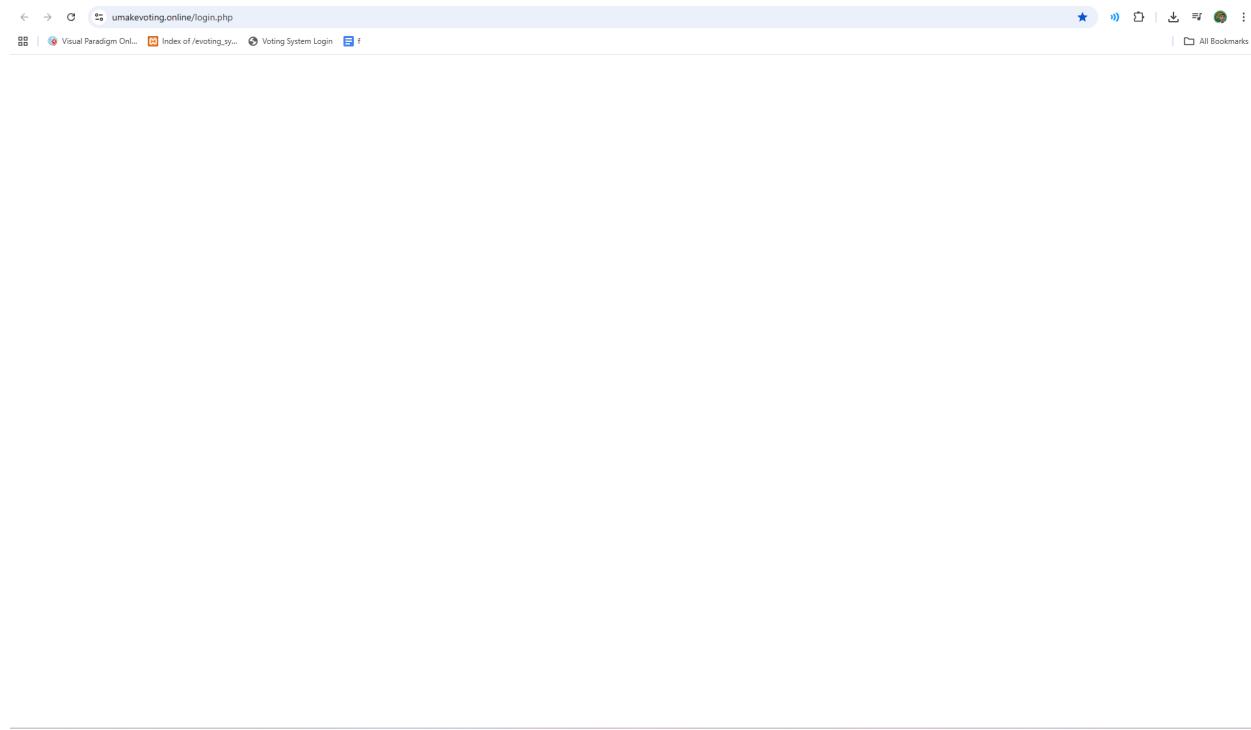

All files from github repository is deployed

The screenshot shows a file browser interface with the path 'public_html'. The left sidebar includes sections for 'My files', 'New folder', 'New file', 'Trash bin', 'Space' (0.01%, 704 KB / 10 GB), 'Inodes' (0.09%, 186 / 200000), and 'Settings'. The main area displays a list of files with the following details:

Files not working properly due to incorrect db connection strings

Create database

A screenshot of the Hostinger website management interface. The left sidebar shows various services: Home, Websites, Domains, Horizons, Emails, Email marketing, VPS, Website, Files, Databases (selected), Management (selected), phpMyAdmin, Remote MySQL, and Advanced. The main content area is titled 'Management' and shows a 'Create a New MySQL Database And Database User' form. The form fields are: MySQL database name (u803144294_), Database Name (u803144294_), MySQL username (u803144294_), Username (u803144294_), and Password (>Password). A green 'Create' button is at the bottom. A success message 'Database created successfully' is displayed above the form. Below the form is a table titled 'List of Current MySQL Databases And Users' with one entry: MySQL Database (u803144294_system), MySQL User (u803144294_system), Created at (2025-11-29), and Website (umakevoting.online). There is also a 'Enter phpMyAdmin' button and a three-dot menu icon.

Import backup of database

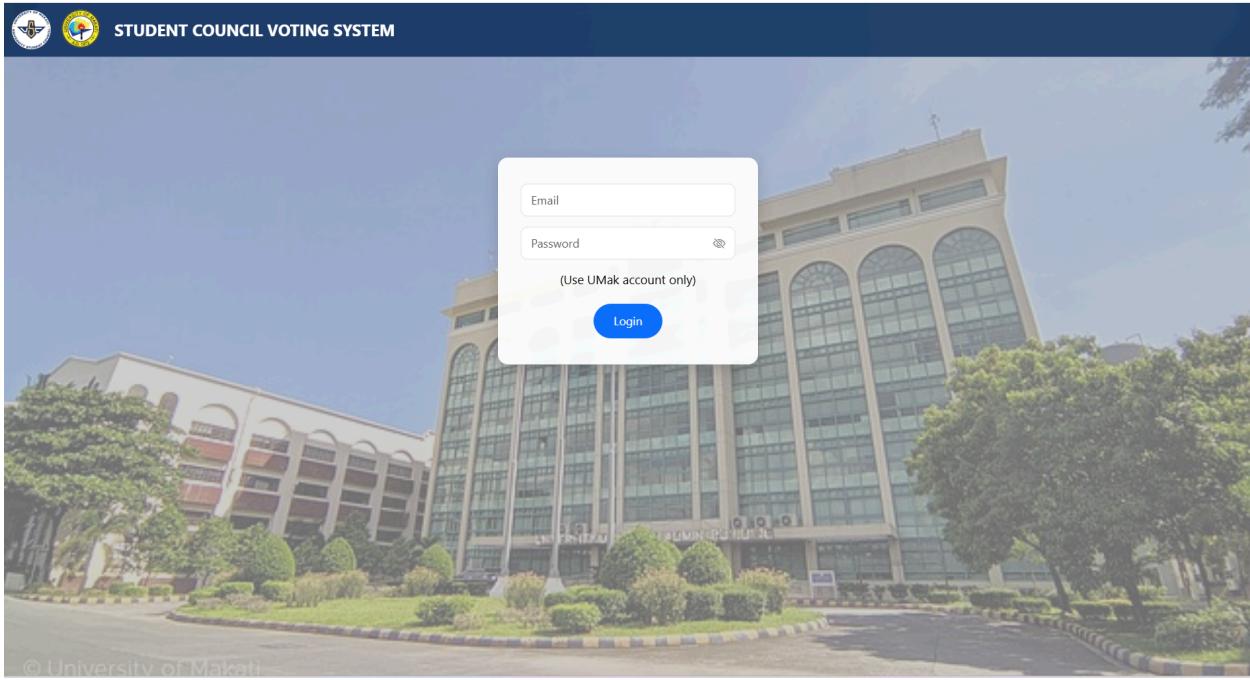

The screenshot shows the phpMyAdmin interface for importing a database. The left sidebar lists databases and tables. The main area is titled "Importing into the database "u803144294_system"" and contains several configuration sections:

- File to import:** A file named "u803144294_system.sql" is selected.
- Partial import:** An option to allow interruptions for large files is checked.
- Other options:** "Enable foreign key checks" is checked.
- Format:** Set to "SQL".
- Format-specific options:** SQL compatibility mode is set to "NONE".

Configure connection string for database connectivity

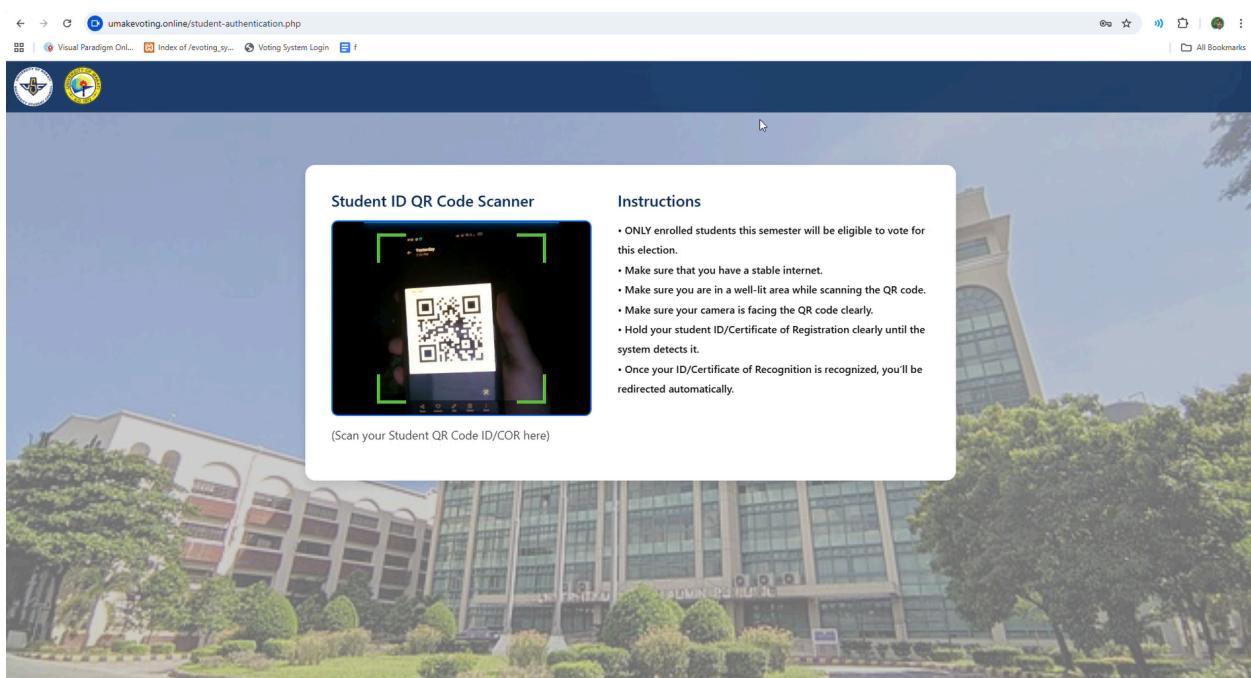

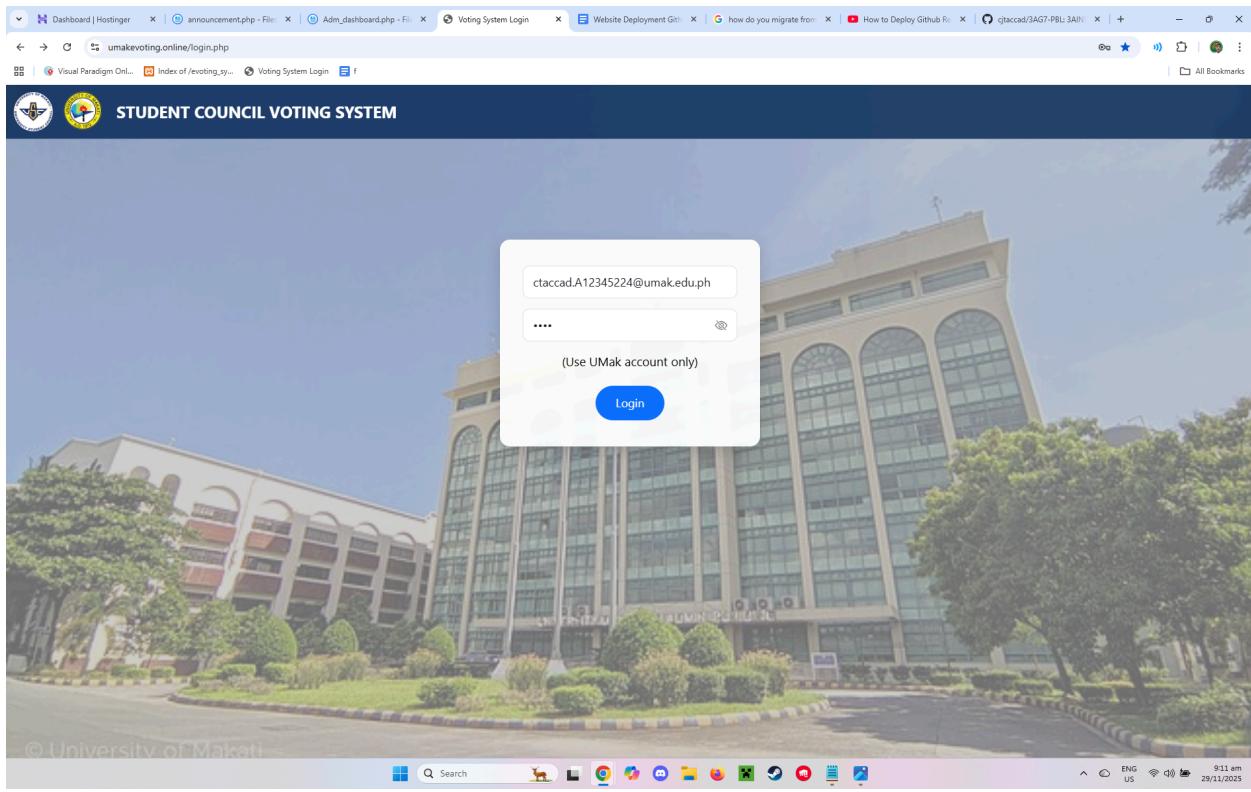

```
/* ----- 1. DB CONNECT ----- */
$host = "localhost";
$username = "u803144294_system";
$password = "██████████";
$database = "u803144294_system";
```
